1. (Amended) A low depth tray for bottles, comprising:
 a first pair of opposed walls;
 a second pair of opposed walls attached to the first pair of opposed walls to form
 a wall structure;
 a base attached to the wall structure;
 a plurality of interior divider walls extending upwardly from the base; and
 at least one interior member projecting upwardly from an interior of the wall
 structure and connected to the divider walls, the at least one interior member having a height
 less than the height of the wall structure and less than the height of bottles loaded in the tray,
 wherein the at least one interior member, the base, the divider walls, and the
 wall structure define a plurality of bottle retaining pockets which are each sized to receive a
 single bottle therein.

36. (New) A low depth tray for bottles, comprising:
 a base;
 a wall structure extending upwardly from the base;
 a plurality of interior divider walls extending upwardly from the base within the
 wall structure; and
 at least one interior member projecting upwardly within the wall structure and
 connected to the divider walls, the at least one interior member having a height greater than
 the height of the divider walls but less than the height of the wall structure and less than the
 height of bottles loaded in the tray, wherein the at least one interior member, the base, the
 divider walls, and the wall structure together define a plurality of bottle retaining pockets.
